Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 15 objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-42 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. For claims 1-42, the recited limitations are directed to a packet format, which does not fall into the statutory categories of a "process, machine, manufacture, or composition of matter, or any new and useful improvement thereof."

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2609

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 13, and 32 rejected under 35 U.S.C. 102(e) as being clearly anticipated by Ryan (U.S. Patent 7,065,036).

For claim 1, 13, and 32, Ryan teaches an apparatus comprising a data packet generator to generate a data packet including at least one of a compatibility preamble field, two or more training fields and a physical layer convergence protocol header that includes bit and power loading information (see column 6 lines 42-53), and wherein at least some of the compatibility preamble field, the two or more training fields and the physical layer convergence protocol header are encoded with a predetermined code and modulated by a predetermined modulation scheme (see column 5 lines 6-13 and figure 3).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shoemake et al. (U.S. Patent Publication 2003/231715) and Jacobsen (U.S. Patent Publication (U.S. Patent Publication 2003/0193889) are cited to show subject matter that is pertinent to the claimed invention.
